1 ABOUT THIS MANUAL

1.1 Using this manual

This installation guide contains all the information you need to install the BAUR Software 4 and to activate the ***Office installation*** option.

1.2 Information on the screenshots used

The screenshots used are intended to illustrate the procedure and may differ slightly from the actual state.

2 INSTALLING AND ACTIVATING THE OPTION

2.1 Prerequisites

- You have Administrator rights for the computer.
- The system requirements are met:

Operating system	Windows 11 Windows 10 (64-bit)
Memory	8 GB RAM Recommended: 16 GB RAM
Display	TFT monitor acc. to quotation Resolution min. 1280 x 1024 pixels Recommended: 1920 x 1080 pixels

2.2 Preparing for the installation

1. Download the installation file for the BAUR Software 4. To do this, go to the *http://download.baur.eu* website and click the ***BAUR Software 4*** link.
2. Save the installation file in a local directory.

2.3 Installing the BAUR Software 4

1.		Double-click on the file *BaurSoftwareSetup.msi*. The installation process starts.
2.		Confirm the user account control prompt by clicking on the ***Yes*** button.
3.		Click the ***Next*** button.
4.		Read the end user license agreement and activate the ***I accept the terms in the License Agreement*** checkbox.
5.		Click the ***Next*** button.
6.		If an older version of the BAUR Software is installed, make a backup. To do this, enable the ***Create backup*** checkbox and select the storage location. If you want to back up the system protocols, enable the ***Backup logs*** checkbox.
7.		Click the ***Next*** button. The selected data is saved to the selected directory as a ZIP file.

8. 
Select whether you would like the BAUR Software to start automatically when the computer is started and click on the ***Next*** button.

9. 
Select the ***No IRG*** option and click on the ***Next*** button.

10.

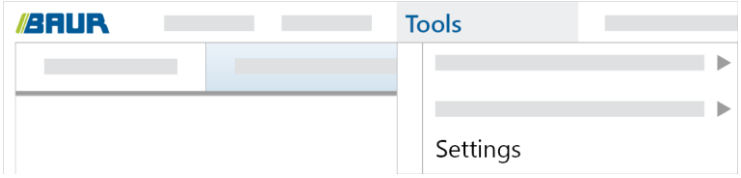
Click the ***Install*** button.

The BAUR Software is automatically installed. Wait until the installation is completed.

11. 
Once the installation is completed, click on the ***Close*** button.

2.4 If necessary: Changing the language

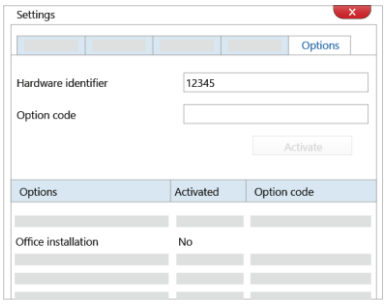
1. Start the BAUR Software 4.
2. In the ***Tools*** menu, select the ***Settings*** menu item.



3. In the ***Settings*** dialog, select the ***Language and units*** tab.
4. Select the desired language from the selection list and click the ***OK*** button.
5. Restart the software so that the BAUR Software is displayed in the selected language.

2.5 Activating the "Office installation" option

1. Start the BAUR Software 4.
2. In the ***Tools*** menu, select the ***Settings*** menu item.
3. In the ***Settings*** dialog, select the ***Options*** tab.

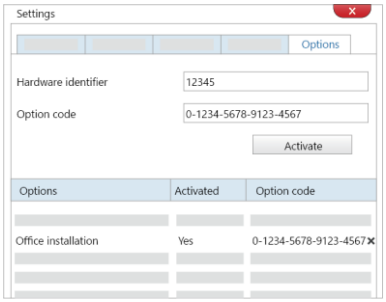


You require an option code to activate the option. The option code is based on the hardware identifier that is displayed in this dialog.

4. Go to the *http://download.baur.eu* website.
5. Select ***BAUR Software 4*** > ***Contact form for activation*** and click the ***contact form*** link.
6. Complete the contact form. To do this, have the following information ready:
   - ***Hardware identifier*** (see screenshot)
   - ***O number***: You will find this number in the document that authorizes the use of this option.
   - Your contact information (name, e-mail address, telephone number)

   You will be sent an option code for the ***Office installation*** option.
7. Enter the option code in the input field and click the ***Activate*** button.

   The option is displayed as activated.



8. In order to be able to work with the option, restart the BAUR Software.

2.6 If necessary: Importing templates

To work more efficiently with the BAUR Software, you can import templates for sequences and evaluation criteria as well as voltage specifications for measurement methods, for example.

Detailed information on working with the BAUR Software 4 is provided in the user manual for the BAUR Software 4.

- To open the user manual, press the F1 key in the open BAUR software.

Procedure

1. Go to the *http://download.baur.eu* website.
2. Select ***BAUR Software 4*** > ***Download BAUR Software 4***.
3. In the ***Templates*** area, download the ZIP file containing the templates.
4. Start the BAUR Software 4.
5. Select ***Tools*** > ***Data exchange*** > ***Import measurement framework***.
6. In the ***Import file*** tab, select the file that you previously downloaded.
7. In the tabs, select the data that you want to import.
8. Click the ***Start*** button.
   The selected measurement framework is imported.
